

Burning Instructions - Bika Candles

	Never leave burning candles unattended.		Place burning candles at least 10 cm apart.
	Keep out of the reach of children or pets.		Always place candles on a fire-proof support.
	Keep burning candles away from inflammable objects.		Candles that stand in a draught may not burn down evenly. Do not let the candle stand in the sun as it may lose its shape or colour intensity.
	Keep the wick trimmed.		Caution

You will have hours of enjoyment from your candles if you follow this advice:

- In order to get the best effect, let the candle burn for 3 to 4 hours after first lighting it.
- After 20 hours of burning, the rim will begin to open.
- Depending on the size, the candle burns 90 to 200 hours.
- Should the wax overflow, put out the flame and pinch the opening together in order to close it; when the wax is solid again, you may relight the candle.
